Earthquakes for week of
July 9-15, 1995

	1-2	2-3	3+	Total
This week	83	27	3	113
Previous week	79	18	4	101

▼ **Mammoth Lakes region:** Activity continued to be elevated. The Mt. Morrison swarm continued with 66 events, including 15 2.0s and two as large as 3.5 and 3.3; 14 tremors in the Casa Diablo Hot Springs area, including a pair of 2.0s; and nine 1.0s near downtown Mammoth Lakes. This is the most significant activity since late October 1994.

▼ **Markleeville region:** Largest measured 2.2.

▼ **Regional Activity:** Remained elevated for the 2nd straight week. A 3.0 triggered in Antelope Valley between Walker and Topaz Lake, a 2.2 was detected southwest of Bridgeport near Upper Twin Lake, and a weak 1.6 tremor was centered in the Mono Craters. Two aftershocks from the June 18 4.2 earthquake between Portola and Quincy measured 2.9 and 2.2. A 2.3 occurred near Mt. Hicks, a 2.0 was centered along the Gabbs Valley fault, and a 2.0 triggered in the Columbia Salt Marsh region south of Mina.
