Earthquakes for week of
July 16-22, 1995

	1-2	2-3	3+	Total
This week	63	27	1	91
Previous week	83	27	3	113

- ▼ **Mammoth Lakes region:** Activity in the Mt. Morrison seismic trend continued to be elevated. The largest of 45 events, including 13 in the 2.0 range, measured 2.3. Six quakes were centered near Lake Crowley, including one as large as 3.5. It occurred Thursday evening and was widely felt in the region.
- ▼ **Markleeville region:** Four quakes were detected in the Double Springs aftershock zone, including one as large as 2.9. A cluster of six events, including four 2.0s, were recorded along the southern extension of the Genoa fault zone near Grover Hot Springs.
- ▼ **Regional Activity:** The largest of three 2.0s along the Honey Lake fault zone measured 2.9 and two quakes registering 2.5 and 1.7 triggered along the Mohawk fault zone south of Portola.
- ▼ **Historic Activity:** Powerful earthquakes measuring 6.6 and 6.2 occurred July 20 and 21, 1986, respectively, 6 mi. north of Bishop in Chalfant Valley.
