

Seismo-Watch

Week of April 8-14, 1993

Seismicity was slightly decreased this week with 41 events registering greater than 1.0. The strongest earthquake registered 2.9 and occurred a few miles southeast of Coalinga. A 2.7 quake rumbled in Nunez Canyon last Friday. ■ Aftershocks from last weeks' 4.2 earthquake continued in the Parkfield area. Four quakes were recorded with the largest measuring 2.4. A couple of 2.1's occurred further north in the Stockdale Mountain area.

■ A few minor quakes were measured north of San Juan Bautista and on the southern end of the Sargent Fault, probably associated last week's magnitude 3.0's. Minor tremors also occurred west of Tres Pinos and Paicines

■ The central San Andreas near San Benito recorded 7 minor tremors the largest measuring 2.1. Two other 2.1's were recorded in the area, one centered closer to Bitterwater and the other north of Panoche.

■ Two small events occurred along the coast northwest of San Simeon. A 1.9 quake was measured on the San Gregorio Fault west of Santa Cruz.
