Magnitude

The Coachella Valley Earthquake Report

Sep. 25 - Oct. 1, 2003

Magnitude M \geq 1	1	2	3	4+	Total
This Week	10	0	0	0	10
Previous week	7	0	0	0	7

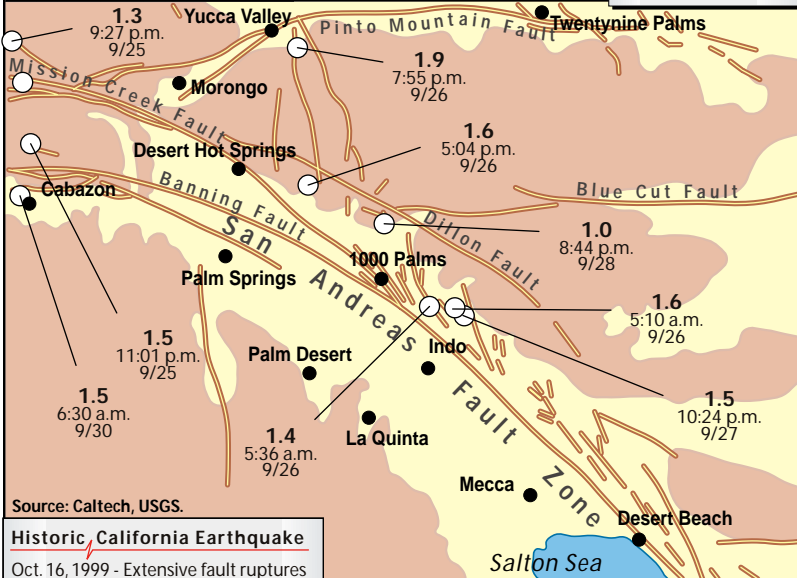

▼ The number of earthquakes registering M 1.0 or greater in the greater Coachella Valley region increased from the previous week, rising by three events and reaching double-digit figures for the first time in five weeks and the second time in eleven weeks. The intensity of seismicity remained relaxed as no activity measured M 2.0 or stronger. It was the fifth consecutive week without and M 2.0s, the longest gap since August of last year.

▼ The largest earthquake measured M 1.9 and occurred September 26 about a mile southeast of Yucca Valley High School at the base of Burnt Mountain.

▼ East of Desert Hot Springs was a M 1.6 tremor. It was centered in West Wide Valley close to the aqueduct.

▼ The largest of two quakes about ten miles north of Indio near the mouth of Indio Canyon measured M 1.6. Two miles to the west and close to the Indio Hills was a tremor registering M 1.4.

▼ A couple of M 1.5s occurred near Cabazon.

Historic California Earthquake

Oct. 16, 1999 - Extensive fault ruptures
Lavic Lake (Hector Mine) **M7.1** quake
